

Redesign the Misleading Colored Chart

R.No: 11 Reg. No: 192325008 Name: DEEPA V

Each chart below uses color in a misleading or confusing way. For each one, answer the three questions in your own words.

Chart 1

1. What is this chart trying to show?

2. What's wrong with the color choice?

3. Propose a better color scheme (describe it in words):

Chart 2

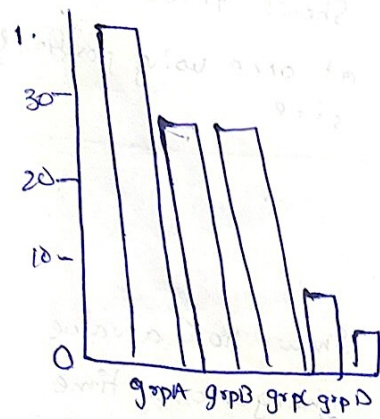

1. What is this chart trying to show?

2. What's wrong with the color choice?

3. Propose a better color scheme (describe it in words):

Activity 2

- i What is the chart trying to show?
 - It shows the revenue earned by different stores from Store A to Store G.
- ii What's wrong with color choice?
 - The color change according to the revenue values, but the color scale is confusing & makes some stores appear more or less important based on color rather than the actual bar height.
- iii Use one consistent color for all stores, such as blue. If highlighting one particular store is necessary, use a contrasting color only for that store.

Chart 2

- i What is this chart trying to show?
 - It shows the number of responses for different course difficulty ratings from 1 star to 5 star.

ii What's wrong with color choice?

- Each rating uses a different bright, color which can make the categories look unrelated & distract from the comparison of response counts.

iii Propose a better color scheme:

- Use the same color for all rating categories or use a single sequential color gradient from light to dark to represent the rating levels consistently.
